Prof. Eric Castelli – Prof. Pham Thi Ngoc Yen - International Research Center MICA - Multimedia, Information, Communication & Applications – Hanoi, Vietnam.

Define and propose new services and new uses

- **Objectives:**
  - Answer as better as possible to **needs, expectations and wishes of users**, with the help of Information Technology tools disseminated into perceptive environments
  - Propose an **"user adapted" computing***
  - Approach **for large scale perceptive** environments studies
- **Approaches:**
  - Selecting mobile manipulation service tasks to be investigated
  - Giving a description of possible technologies to develop
  - Human interaction and knowledge based behavior
  - Environment modeling and understanding

- "computing" = all I.T. tools
